Brown with light spots, fibrous, smells of iodine when snapped

STEM

Single stemmed shrub; Short branches near low ground, grey to brown hairy few pale minute lenticels

ETHNOBOTANY

Interrelations between people and plants

Rainforest regenerate, Strong fibre, Hard small timber rarely used

Preparation made from leaves& applied as a dressing for wounds 861

Toxic to Stock; All parts contain Glycoside trematoxin toxic if eaten by stock 6-14kg

Toxicity high risk in goats (Simmonds, Holst, & Bourke 2000)

BIRD

Attracting fruit eating birds: Black globular fleshy fruit sought by birds16

brown fruit dove, figbird (seen 8/6/07), lewin's honeyeater(1/6/10), olive-backed oriole, Australian King Parrot, Pale-headed Rosella

BUTTERFLY

Catopyrops florinda (speckled line-blue)

BEE

MOTH

Aenetus splendens (splendid ghost moth)70

INDIGENOUS USE

ID FEATURE

Differs from *Trema* var *tomentosa* is rough to touch. Looks similar to weed *Celtis sinensis* (Chinese Elm)

COMMENTS

World has 15 species Aust has 2 species

*Celtis sinensis** Chinese Elm
